

Frequently Asked Questions

Q: Does the program run all year long?

A: Yes, the program is full-time and runs from 9:00am-3pm, Monday-Friday all year long. The program does not run on statutory holidays.

Q: Do we need to sign up to attend Monday-Friday?

A: No, the program offers a variety of part-time options to suit each person's needs.

Q: Is there an opportunity for people to move during the week?

A: Yes, we specialize in incorporating a movement component into the program every day. Individuals are given the opportunity to be out of their wheelchair and are supported in moving their bodies.

Q: Do we need to send our own staff?

A: No, we have staff available to support each individual. If individuals prefer they are welcome to bring their own staff.

Q: Is there a standard rate for the program?

A: The program rates vary depending if staff is provided and how many days a week an individual attends. Please contact us for the specific rates.

FACE

Families of Alberta
for Conductive Education
Adult Program

Movement Program

Our program specializes in movement-based programming which varies throughout the week. Combining physical literacy and social inclusion to enhance the overall wellbeing of the individual. Classes are run in groups with peers and focus on maintaining and the advancement of gross and fine motor skills.

Our Goal

To foster independence for individuals affected by neuromotor concerns.

Helping individuals thrive in their daily activities.

What sets up apart?

We specialize in working with individuals with motor disabilities. We always have a qualified therapist on site to teach support workers appropriate ways to attend to each participant.

Centre of Excellence

We have a fully accessible facility with lifts where individuals of all abilities can access all of our programs.

Continued Learning

At FACE we believe that learning never ends. Our program provides new experiences where individuals continue to develop and create new

Social Program

The social program varies from week to week and centers around team building along with exploring new hobbies and interests with peers.

Communication Program

The program specializes in using Augmentative and Alternative Communication (AAC) and allows uninterrupted communication in a supportive environment.

Music Therapy at FACE

Music therapy is an evidence-based treatment which has been shown to promote auditory skills, cognitive function, and enhance mood. The adult program has weekly music therapy and musical aerobics classes to engage and stimulate the participants.
